

# Hüseyin Erçelebi Anadolu High School

## Eskişehir, TURKEY

**Hüseyin Erçelebi Anadolu High School** is located in Eskişehir, Turkey. Eskişehir is a big city that has taken many European awards in terms of its city planning and living conditions. Our School is near the city center and easy to reach from any location in the city.

Our School provides students with academic education needed to step in universities. Our courses include both science and literature topics. We have nearly 300 students from different ages between 14-18. We have 32 teachers, each of whom is experienced in their fields.

Although we created many local projects, we haven't experienced any Erasmus+ project yet, as we are a (5-years) new school. However, we are eager to coordinate or participate in any project in favor of our students, thanks to the Erasmus+ experienced teachers.

We are an academic high school, so we tend to foster and enhance our students' critical thinking, creativity, communication and collaboration skills. We want to equip them with the skills required to use the knowledge effectively in every area of life with the help of

**Erasmus+ School Education Projects.**

## PROJECTS & ACTIVITIES

**Hüseyin Erçelebi Anadolu High School** has experience in local projects & science exhibitions. Our students have created many scientific projects and be granted support funds by TUBITAK (The Scientific and Technological Research Council of Turkey). Our students have achievements in many other local contests related to literature and sports.

We have a **project club** in our school to encourage our students and teachers to make new projects real. This Club mainly aims to organize projects, workshops & meetings about any issues related to youth.

Our school is also one of the partners of **"-25 Association"** which is supported by the EU and run by International Children's Care (ICC). Our students & teachers attend the workshops and raise awareness of the rights and problems of children.

Our school intends to manage the creative & innovative projects under the roof of **Erasmus+ Programme** in both European and local context, and also enable the youth to get involved in different projects that contribute their personal & academic skills.
